

Magnix® ...the Safe & Versatile Magnetic Alternative!

What is Magnix®

Magnix® enjoys numerous competitive advantages compared to traditional magnetic technologies currently utilized, such as metal sheets, rubber iron sheets and metal magnets.

SAFER

Magnix® ink is laid down during the printing process and the end product appears no different than products that have no magnetic element. Therefore it raises no safety concerns such as the sharp edges or removable backing that plague competitive technologies.

LIGHTER

Magnix® ink is at least 50% lighter than the lightest configurations of metal sheets or rubber iron paper.

MORE COST-EFFECTIVE

Magnix® ink can be laid down at a cost per square inch that is at least 67% cheaper than rubber iron sheets or metal sheets.

OVER 10 MILLION COPIES SOLD

Magnix® has become the **De Facto Standard** for magnetically interactive children's books.

PATENTED

Magnix® is a patented technology with patents granted and pending globally.

Contact Us

For further information on the use of Magnix® in your company, please contact Ann Szamboti at ann.szamboti@sandviks.com or 610-975-9238 or Patricia Rauch at patricia@sandviks.com or 610-975-3582. Visit our web site at www.sandvikinnovations.com
